

Improving
Field to Finish
Productivity

Looking beyond products to provide *a complete solution* *From Field...*

Data Collection

Cansel helps organizations measure, analyze, design and build more efficiently and profitably. We are the only company of its kind, providing unique and tailored solutions for over 40 years. Some of the markets we serve include engineering, surveying, construction, mining, architecture, manufacturing, utilities, forestry, and government.

Partnering with the world's leading technology manufacturers, (such as Canon, Trimble and Autodesk) *Cansel's* national team of professionals combines software, hardware and services to improve your workflow:

from field to finish.

Data Integration

Design & Visualization

Customers have access to an entire Field to Finish solution across their whole organization.

data integration;
the market has
changed and so
have we.*

Cansel's national presence and close alignment with world leading distributors and manufacturers allows us to hold an extensive supply of inventory, meaning faster delivery to our customers.

Work with us to optimize your *workflow*

Guided by markets, united by solutions

Survey

We have been providing high-end survey instruments, survey crew accessories and measuring products throughout Canada since 1978. Cansel is Trimble's largest distributor of survey equipment and we continue to partner with some of the world's most trusted manufacturers.

Mapping & GIS

Cansel is the Canadian reseller of Trimble Mapping & GIS and Utilities Field Solutions and a long-time ESRI business partner. We work to mobilize your workforce and your field solutions, making in-time data mapping and processing the norm rather than the exception.

Autodesk

For over 25 years Cansel has provided tailored solutions of Autodesk technologies including customization and programming, network configurations, project assistance, workflow analysis, standards development and pre and post-sales support. Alongside our outstanding technical support we also offer public and customized training programs at our Authorized Autodesk Training Centres.

Through the consolidated strength of our businesses, Cansel is able to provide both your individual project needs & address a much larger solution for your entire organization.

to maximize
your investment
in technology
and simplify
project delivery;
no matter
what industry
you're in.*

General Line / Construction

Our general line construction products span all survey, engineering, construction and field requirements. Some of the products we carry include total stations, levels, lasers, pipe and pin locators, paint, flagging, vests, and safety supplies. Cansel's nationwide presence and volume of offices ensures extensive supply and fast delivery. Rentals, repairs, training and technical support is all provided by our in-house sales and support personnel.

Wide Format Products

Our field to finish services include the sales, service and installation of state-of-the-art digital printing, scanning, copying and plotting equipment, and corresponding supplies.

Print Services

Our wide format printing business, Cansel Wade, has led the way in reprographics in the Atlantic Provinces for over 55 years; our success is based on total commitment to providing quality products and excellent customer service. From a wide variety of large and small format colour and black and white documents, we are able to offer customers a turn-key solution to all of their printing, archiving and construction requirements to commercial standards.

Can-Net

The Can-Net Virtual Reference Station Network allows users to get cm level RTK accuracy without a base station. Can-Net has the largest coverage, greatest precision, and fastest initialization time, while eliminating base station set-ups to save time and money. The system continues to grow with over 200 GNSS reference stations coast to coast, providing our customers with continuous 24 hour data for increased field crew productivity.

Allowing you to *create and build*
