

# Introducing Utility Locate Mapper by TerraFlow

The most configurable and flexible utility mapping solution on the market

Get total control on how you collect and receive your data, streamlining your workflow faster and smarter.

## How it works

Start collecting

Capture all locates and other assets

Sync your data with your systems

Finished map sketch

Utility Locate Mapper by TerraFlow adapts to your field-proven workflow, simplifies data collection, synchronizes back to your desktop and seamlessly integrates to your office software, report, sketch, or map.

Built-in one button touch support for all Bluetooth® enabled utility locators.

## What accuracy are you looking for?

Sub-meter? 10 centimeter?  
1 centimeter?

Cansel's solution allows you to pick the accuracy you need based on your different projects requirements.

Built-in support for best-in-class GPS equipment such as Trimble's R1, R2 or Catalyst and correction services such as Cansel's Can-Net or Trimble FieldPoint RTX ensures you get the best positional accuracy possible.
